Professional Summary

Computational Scientist (PhD, Physics) with 10+ years building high-performance numerical algorithms and physics-based simulations. Expertise in scientific machine learning and geospatial data analysis. Architect of open-source simulation libraries, leader of funded research projects, and translator of complex physical models into production-quality scientific software across cross-functional research and engineering teams.

Skills

Languages: Python, C/C++, R, Rust, SQL, Fortran 95, Java, Julia, Shell

ML & Data: Scientific ML, PyTorch, scikit-learn, TensorFlow, random forest, neural networks, SVM, gradient-based optimization, ML-assisted parameter estimation, NumPy, SciPy, Pandas, Astropy

Geospatial & Remote Sensing: Sentinel-1/2 multispectral processing, raster/vector data pipelines, QGIS, geospatial feature engineering for ML

Simulation: Physics simulation (multiscale/multiphysics modeling, radiative transfer, relativistic MHD, Lagrangian particle dynamics), numerical PDEs (advection–diffusion, Fokker–Planck), finite difference/volume methods, numerical linear algebra, synthetic dataset generation, uncertainty quantification, parameter estimation

HPC & Parallel: OpenMP, MPI, OpenACC, SLURM, PBS, HDF5, large-scale parallel CPU computing

Tools: Git, Docker, Azure, Jenkins, Kafka, Jira, ParaView, VisIt

Experience

Independent Contractor **Jan 2026 – Present**
Mercor *Remote*
Physics subject-matter expert evaluating frontier language models for multiple leading AI labs.
- Review 50+ expert-level physics, hydrodynamics, astrophysics, and cosmology problems for leading AI labs; write original prompts that stump frontier models.
- Diagnose failure modes in model reasoning and write structured feedback to improve scientific accuracy.

Spatial Data Scientist **May 2025 – Jan 2026**
TealWaters *Seattle, WA*
Built geospatial ML pipelines and optimized terrain-analysis code for wetland mapping.
- Mapped wetland probability across the 2,160 km² Skykomish watershed with the Wetland Intrinsic Potential (WIP) random-forest model, reaching >75% accuracy.
- Optimized the terrain-modeling code that computes elevation derivatives from 1 m, 3 m, and 10 m DEMs over 20 tiles, improving its computational performance.
- Engineered features from Sentinel-1/2 multispectral imagery and terrain derivatives for ML land-cover and wetland models; built Python tools and QGIS visualizations.
- Presented results to managers and decision-makers, trained 2 colleagues on the WIP tool, and worked with software engineers to move prototype tools into production.

Independent Researcher & Open-Source Developer **Jan 2024 – May 2025**
Self-directed *Seattle, WA*
Continued simulation research and open-source development between industry roles.
- Co-developed Tleco, a Rust/Python toolkit that solves the Fokker–Planck equation coupled to radiative transfer to model radiation from relativistic outflows (ApJ 2024) [9].
- Developing WindsOfChange with the UW Forest Mycobiome Lab: a C++/R library that simulates wind-driven spore dispersal over forested, hilly terrain, parallelized with RcppParallel and OpenMP.
- Invited talk on machine learning in environmental science at the University of Washington (2024).

Software Engineer **Apr 2022 – Jan 2024**
Paychex *Remote*
Built and tested data-integration services between enterprise systems and Oracle E-Business Suite.
- Built Java Kafka consumers that moved data between enterprise databases, deployed through Jenkins and OpenShift CI/CD pipelines.
- Created Splunk dashboards tracking the 200–400 users shared between enterprise systems and Oracle EBS, with alerts for production incidents; prepared and validated Oracle EBS data with SQL.

- Wrote full test suites for 5+ Python services in the CI pipeline, keeping production defect rates low.

Postdoctoral Research Associate **Feb 2021 – Apr 2022**
Rochester Institute of Technology *Rochester, NY*
HPC simulations of supermassive black hole binaries in an NSF-funded project.

- Led a 7-person team upgrading PatchworkMHD, a C code for magnetohydrodynamic simulations of supermassive black hole binaries.
- Added black hole spin to the simulations with under 5% runtime overhead.
- Ran and benchmarked large production simulations on Frontera (TACC), about 10,000 node-hours, and identified performance bottlenecks in the parallel code.
- Calibrated Paramo against Fermi-LAT gamma-ray spectra with gradient-based optimization that updates the model automatically; supervised a graduate student on the same problem.
- Co-authored 2 papers from a multi-institution study of binary neutron star mergers [6, 7] and a third on blazar heating and cooling [8].

Postdoctoral Research Fellow **Oct 2018 – Nov 2020**
Purdue University *West Lafayette, IN*
Radiative-transfer modeling of relativistic jets (blazars and gamma-ray burst afterglows).

- Designed and wrote Paramo, an open-source Fortran 95 library that solves the Fokker–Planck equation for relativistic particle distributions coupled to radiative transfer; optimized it with OpenMP and tested GPU offload with OpenACC.
- Paramo has been adopted by other research groups, including Combi & Siegel (2023).
- Served as co-I on two NASA Fermi Guest Investigator grant proposals; the funded one ($68K) supported the finding that blazar jets launch with similar energy per baryon, independently of their power [5].
- Added numerical-integration and OpenMP features to Paramo and built Python tools to compute energy losses and spectra of high-energy particles in gamma-ray burst afterglows [4].
- Mentored 3 graduate students (1 M.S., 2 Ph.D.), co-authoring papers with each.
- Modeled the COVID-19 outbreak in Mexico (Python) and co-wrote Spanish-language infographics in a campaign against misinformation.

Postdoctoral Research Fellow **Jan 2018 – Sep 2018**
Universidad Michoacana de San Nicolás de Hidalgo *Morelia, Mexico*

- Built a Python pipeline that turned GRTrans black hole simulation images into training data for an SVM classifier of black hole spin (grayscale conversion, intensity normalization, spatial feature extraction).
- Released an open-source Python tool for radiative-transfer spectra and light curves.
- Organized an HDF5 workshop to train graduate students in high-volume data storage.

Graduate Research Assistant **Oct 2011 – Jul 2017**
Universitat de València *Valencia, Spain*

- Automated runs of the C-SPEV radiative-transfer code with Shell and Python pipelines: 10–60 simulations per project and tens of GB of HDF5 output, with data-quality checks for downstream analysis.
- Analyzed Fermi-LAT and VLBA multi-wavelength observations, cross-matching sources across catalogs and fitting log-parabola spectra.
- Fit C-SPEV simulation models to telescope data, identifying spectra and light-curve patterns that quantify plasma magnetization in blazars.
- Extended C-SPEV to compute discrete and continuous spectra from particle distributions of arbitrary shape, without affecting simulation runtime.
- Published 2 first-author papers in MNRAS [2, 3].

Education

Ph.D. in Physics **Oct 2011 – Jul 2017**
Universitat de València *Valencia, Spain*
Excellent *cum laude*
Advisors: Prof. Miguel A. Aloy and Dr. Petar Mimica
Thesis: Numerical treatment of radiation processes in the internal shocks of magnetized relativistic outflows

M.Sc. in Physics **Aug 2009 – Sep 2011**
Universidad Michoacana de San Nicolás de Hidalgo *Morelia, Mexico*
Advisor: Prof. José A. Cervera
Thesis: *Study of TOV stars with the SPH method*

B.Sc. in Physics **Aug 2004 – Dec 2008**
Universidad Autónoma del Estado de México *Toluca, Mexico*
Advisor: Prof. Francisco S. Guzmán
Thesis: *Numerical solution of null geodesics for the generation of gravitational lenses produced by spherically-symmetric and static spacetimes*
Lic. Juan Josafat Pichardo Cruz Award

Grants and Fellowships

Research Grants

NASA Fermi Guest Investigator Program, Cycle 12 **2019**
A simple model to understand the blazar sequence *Grant #121077, $68K*
PI: D. Giannios; Co-I: J. M. Rueda-Becerril

Fellowships

International Postdoctoral Fellowship **Oct 2018 – Nov 2020**
National Council of Science and Technology (CONACyT), Mexico

Postdoctoral Fellowship **Jan 2018 – Sep 2018**
Secretariat of Public Education, Mexico (Program for the Professional Development of Higher Education Institutions)

Study-Abroad Fellowship **Sep 2014 – Aug 2016**
National Council of Science and Technology (CONACyT), Mexico

Santiago Grisolía Fellowship **Oct 2011 – Jun 2014**
Council of Education, Research, Culture and Sport, Valencian Community, Spain

M.Sc. Fellowship **Sep 2009 – Aug 2011**
CONACyT, at the Institute of Physics and Mathematics, Universidad Michoacana de San Nicolás de Hidalgo

Summer Research Fellowship (XVII Summer of Scientific Research) **Jun 2007 – Aug 2007**
Mexican Academy of Sciences

Software and Projects

Blazar Population ML **Jan 2026 – Present**
Scientific ML (Python, scikit-learn, PyTorch) *github.com/altjerue/ilwikak-ml*

- Applying classical ML and Bayesian inference to the Fermi-LAT 4LAC-DR3 catalog (3,407 sources) to recover physical jet parameters from multi-wavelength data.
- Building a neural-network emulator of the physics-based Tleco model that maps physical jet parameters to observable spectral energy distributions, to be validated against Tleco output (in progress).
- Forecasting blazar gamma-ray flares with a time-series foundation model fine-tuned on Tleco-generated synthetic light curves.

WindsOfChange **Aug 2024 – Present**
Lagrangian particle-dispersion library (C++/R) *github.com/UW-ForestMycobiomeLab/WindSporesHills*

- Simulates particle dispersion, atmospheric turbulence, and flow over hilly terrain with forest canopy, based on analytical models (Massman & Weil 1999; Finnigan & Belcher 2004); designed to scale to tens of thousands of particles over kilometer-scale domains.

Tleco **Jan 2024 – Sep 2024**
Radiative-transfer toolkit (Rust/Python) *github.com/zkdavis/Tleco*

- Numerical PDE solvers, particle-distribution algorithms, and spectral calculations for relativistic plasmas; successor to Paramo [9].

Paramo **Oct 2018 – Apr 2022**
Radiative-transfer library (Fortran 95, OpenMP) *github.com/altjerue/paramo*

- Fokker–Planck and radiative-transfer solver for relativistic particle distributions, parallelized with OpenMP; used by other groups, including Combi & Siegel (2023).

PatchworkMHD **Feb 2021 – Apr 2022**
Large-scale MHD simulation code (NSF project)

- Led a 7-person upgrade of this production C code for HPC environments, adding black hole spin with under 5% runtime overhead.

Awards

Marcos Moshinsky Award for Best Poster **Sep 2020**
9th International Workshop on Astronomy and Relativistic Astrophysics (IWARA 2020), video conference

Lic. Juan Josafat Pichardo Cruz Award **2009**
Universidad Autónoma del Estado de México
For defending a licentiate thesis within a year of completing the undergraduate coursework.

Presentations

Invited Talks

The Role of Machine Learning in Environmental Science **Mar 2024**
Seminar on Climate Change Ecology, University of Washington *Seattle, WA*

Morphology of the spectra from numerical simulations of the internal shocks model for blazars **Feb 2019**
Astrophysics Seminar, Purdue University *West Lafayette, IN*

Numerical simulations of the internal shocks model in magnetized relativistic jets of blazars **Jun 2018**
DATA Group Weekly Seminar, Instituto de Astronomía, UNAM *Mexico City, Mexico*

Numerical treatment of non-thermal radiation in the internal shocks model for blazars **Mar 2018**
Weekly Seminar, Instituto de Física y Matemáticas, Universidad Michoacana de San Nicolás de Hidalgo *Morelia, Mexico*

Numerical simulations of the internal shock model in magnetized relativistic jets of blazars **Oct 2014**
IVICFA's Fridays: Computation in Physics, IFIC *Paterna, Spain*

Contributed Talks

Simulations of supermassive binary black holes accretion dynamics in the spinning case **Apr 2022**
APS April Meeting 2022 *New York, NY*

A numerical approach to the Klein-Nishina corrections of radiative cooling in relativistic outflows **Apr 2021**
APS April Meeting 2021 *Online*

The blazar sequence revised **Sep 2020**
9th International Workshop on Astronomy and Relativistic Astrophysics *Online*
Video: youtube.com/watch?v=BAZNWLNT69M

Influence of the magnetic field on the spectral properties of blazars in the internal shocks scenario **Jun 2014**
Extreme-Astrophysics in an Ever-Changing Universe *Ierápetra, Greece*

Numerical study of broadband spectra caused by internal shocks in magnetized relativistic jets **Jul 2013**
XXXIV Biennial Meeting of the Royal Spanish Society of Physics *Valencia, Spain*

Posters

A numerical approach for radiative cooling in relativistic outflows **Sep 2020**
9th International Workshop on Astronomy and Relativistic Astrophysics *Online*
Marcos Moshinsky Award for Best Poster. Video: youtube.com/watch?v=0TJiKg7kOPI

Numerical simulations of the internal shock model in magnetized relativistic jets of blazars **Dec 2014**
Swift: 10 Years of Discovery *Rome, Italy*

Numerical study of broadband spectra caused by internal shocks in magnetized relativistic jets **Jun 2013**
The Innermost Regions of Relativistic Jets and Their Magnetic Fields *Granada, Spain*

Teaching and Mentoring

Zachary Davis, graduate student **2018 – 2022**
Department of Physics and Astronomy, Purdue University *Mentoring*
Co-authored papers [8, 9]

Amanda O. Harrison, graduate student **2018 – 2020**
Department of Physics and Astronomy, Purdue University *Mentoring*
Co-authored paper [5]

Hao Zhang, graduate student **2018 – 2019**
Department of Physics and Astronomy, Purdue University *Mentoring*
Co-authored paper [4]

Thermodynamics (graduate level) **Jun 2018**
Instituto de Física y Matemáticas, Universidad Michoacana de San Nicolás de Hidalgo *Substitute Instructor*

Professional Development

High Performance Computing on Frontera **May – Jun 2021**
Jason Allison et al., TACC, Austin, TX *Lecture series*

Writing Winning Grants **Nov 2019**
Dr. Lauren Broyles, Purdue University *Lecture*

XSEDE HPC Workshop: Summer Boot Camp **Jun 2019**
John Urbanic, Purdue University *Workshop*

Data Analysis and Machine Learning with Python **Feb 2017**
Dr. Alejandro Torres, Universitat de València *Workshop*

Numerical Relativity Simulations of BBH Coalescence Using the Einstein Toolkit **Jul 2016**
Dr. Vassilios Mewes, Universitat de València *Workshop, 8 hours*

The Universe in the Light of PLANCK and BICEP2 **May 2014**
Prof. Nick Mavromatos, Universitat de València *Lecture series, 2 credits*

Dark Matter **Sep 2013**
Prof. Alejandro Ibarra, Universitat de València *Lecture series, 2 credits*

International Cargèse School on Cosmic Accelerators — **Apr – May 2013**
Institut d'Études Scientifiques de Cargèse, France — *Summer school*

Introduction to C++ Programming — **Apr 2012**
Dr. Jacek Generowicz, Universitat de València — *Workshop, 6 credits*

Numerical Relativistic Astrophysics — **Mar – Apr 2012**
Prof. Luciano Rezzolla, Universitat de València — *Lecture series, 9 hours*

Fortran for Scientific Computing — **Mar 2012**
HLRS, University of Stuttgart, Germany — *Workshop, 33 hours*

Outreach

Los más rápidos y los más furiosos (The Fastest and the Most Furious) — **Sep 2020**
Community of Undergraduate Physics Students, Juárez Autonomous University of Tabasco — *Online talk*

Una simulación de la física y la astrofísica (A Simulation of Physics and Astrophysics) — **Aug 2020**
Community of Undergraduate Physics Students, Juárez Autonomous University of Tabasco — *Online talk*

ANITA y la teoría de los universos paralelos (ANITA and the Theory of Parallel Universes) — **May 2020**
Científicos Mexicanos en el Extranjero — *Blog post*
mexiciencia.github.io/post/anita

¿Qué es el modelo SIR? (What is the SIR Model?) — **May 2020**
Científicos Mexicanos en el Extranjero — *Blog post*
mexiciencia.github.io/post/modelo-sir

Evolución del brote epidémico de COVID-19 (Evolution of the COVID-19 Epidemic Outbreak) — **Apr 2020**
Científicos Mexicanos en el Extranjero — *Blog post*
Data analysis and modeling collaborator. mexiciencia.github.io/post/covid19

Annual Department of Physics and Astronomy Poster Event — **Nov 2019**
Purdue University — *3 posters*

Post-Doc Panel Q&A: What Happens When We Complete Our PhDs? — **Apr 2019**
Department of Physics and Astronomy, Purdue University — *Panelist*

Annual Department of Physics and Astronomy Poster Event — **Nov 2018**
Purdue University — *Poster*

¿Decía Einstein la verdad? (Was Einstein Telling the Truth?) — **Mar 2009**
Facultad de Ciencias, Universidad Autónoma del Estado de México — *Talk*

Service

Organizing contributor — **Dec 2012**
X Scientific Meeting of the Spanish Astronomical Society — *Valencia, Spain*

Student representative, Governing Council of the Faculty of Sciences — **Aug 2007 – May 2009**
Universidad Autónoma del Estado de México — *Toluca, Mexico*
