Professional Summary

Physicist (Ph.D. and M.Sc. in Physics) with ten years of research in computational astrophysics. Taught a graduate thermodynamics course and mentored three graduate researchers who co-authored papers with me. Teaching approach built on intuition, critical thinking, and collaborative problem-solving.

Teaching and Mentoring

Thermodynamics (graduate level) — Jun 2018
Instituto de Física y Matemáticas, Universidad Michoacana de San Nicolás de Hidalgo — Substitute Instructor

Zachary Davis, graduate student — 2018 – 2022
Department of Physics and Astronomy, Purdue University — Mentoring

Amanda O. Harrison, graduate student — 2018 – 2020
Department of Physics and Astronomy, Purdue University — Mentoring

Hao Zhang, graduate student — 2018 – 2019
Department of Physics and Astronomy, Purdue University — Mentoring

Education

Universitat de València, *Ph.D. in Physics, Excellent Cum Laude* — Jul 2017

Universidad Michoacana de San Nicolás de Hidalgo, *M.Sc. in Physics* — Sep 2011

Universidad Autónoma del Estado de México, *B.Sc. in Physics* — Dec 2008

Experience

Independent Contractor, *Mercor* — Jan 2026 – Present

- Evaluate physics reasoning in AI model outputs for technical accuracy, identifying failure modes and providing structured feedback.

Postdoctoral Research Fellow, *Purdue University* — Oct 2018 – Nov 2020

- Obtained and led a NASA-funded grant studying radiation from active galaxies.
- Mentored three graduate researchers; two are now postdoctoral researchers.
- Published 3 peer-reviewed papers.

Postdoctoral Research Associate, *Rochester Institute of Technology* — Feb 2021 – Apr 2022

- Led an NSF-sponsored project upgrading a high-performance simulation code for modeling black hole binaries.
- Collaborated on a multi-institutional study of binary neutron star mergers, resulting in 2 publications.

Postdoctoral Research Fellow, *Universidad Michoacana de San Nicolás de Hidalgo* — Jan – Sep 2018

- Developed a Python pipeline to process black hole simulation outputs from the GRTrans numerical code, generating SVM training data for radio image prediction.
- Built open-source data analysis tools in Python for radiative transfer phenomena in relativistic astrophysics scenarios.

Outreach

El origen del universo y el sistema solar (The Origin of the Universe and the Solar System) — Feb 2026
Biology students, Facultad de Ciencias, Universidad Autónoma del Estado de México — Online talk

The Role of Machine Learning in Environmental Science — Mar 2024
Seminar on Climate Change Ecology, University of Washington — Seattle, WA

Los más rápidos y los más furiosos (The Fastest and the Most Furious) — Sep 2020
Community of Undergraduate Physics Students, Juárez Autonomous University of Tabasco, Mexico — Online talk

Una simulación de la física y la astrofísica (A Simulation of Physics and Astrophysics) — Aug 2020
Community of Undergraduate Physics Students, Juárez Autonomous University of Tabasco, Mexico — Online talk

Skills

Physics: Mechanics, electromagnetism, thermodynamics, relativity, statistical physics, astrophysics
Computing: Python, Fortran, C/C++, high-performance/parallel computing
Languages: English (fluent), Spanish (native), Nahuatl (basic)

Selected Publications (9 total, 3 first-author)

Full list available on request.
