Professional Summary

Computational Scientist with a PhD in Physics and 10+ years developing high-performance numerical algorithms and physics-based simulations. Expertise in scientific machine learning and geospatial data analysis. Strong mathematical foundations with a track record of architecting open-source simulation libraries, leading funded research projects, and translating complex physical models into production-quality scientific software. Experienced working across cross-functional research and engineering teams.

Skills

Languages: Python, C/C++, Fortran 95, R, SQL, Shell, Rust, Java, Julia
ML & Data: Scientific ML, PyTorch, TensorFlow, scikit-learn, NumPy, SciPy, Pandas, Astropy, ML-assisted parameter estimation, gradient-based optimization, SVM, random forest, neural networks
Geospatial & Remote Sensing: Sentinel-1/2 multispectral processing, raster/vector data pipelines, QGIS, geospatial feature engineering for ML
HPC & Parallel: OpenMP, MPI, OpenACC, SLURM, PBS, HDF5, large-scale parallel CPU computing
Simulation: Physics simulation (multiscale/multiphysics modeling, radiative transfer, relativistic MHD, Lagrangian particle dynamics), numerical PDEs (advection–diffusion, Fokker–Planck), finite difference/volume methods, numerical linear algebra, synthetic dataset generation, uncertainty quantification, parameter estimation
Tools: Git, Docker, Azure, Jenkins, Kafka, Jira, QGIS, ParaView, VisIt

Experience

Independent Contractor, *Mercor* Jan 2026 – Present
Remote

- Physics expert for a leading AI lab: reviewed 50+ expert-level problems in physics, hydrodynamics, astrophysics, and cosmology; wrote original prompts that stumped frontier models.
- Diagnose failure modes in model reasoning and write structured feedback to improve scientific accuracy.

Spatial Data Scientist, *TealWaters* May 2025 – Jan 2026
Seattle, WA

Built geospatial ML pipelines and optimized terrain-analysis code for wetland mapping.

- Mapped wetland probability across the 2,160 km² Skykomish watershed with the Wetland Intrinsic Potential (WIP) random-forest model, reaching >75% accuracy.
- Optimized the terrain-modeling code that computes elevation derivatives from 1 m, 3 m, and 10 m DEMs over 20 tiles, improving its computational performance.
- Engineered features from Sentinel-1/2 multispectral imagery and terrain derivatives for ML land-cover and wetland models; built Python tools and QGIS visualizations.
- Presented results to managers and decision-makers, trained 2 colleagues on the WIP tool, and worked with software engineers to move prototype tools into production.

Independent Researcher & Open-Source Developer, *Self-directed* Jan 2024 – May 2025
Seattle, WA

Continued simulation research and open-source development between industry roles.

- Co-developed Tleco, a Rust/Python toolkit that models radiation from relativistic outflows by solving the Fokker–Planck equation coupled to radiative transfer; published in ApJ (2024) [9].
- Developing WindsOfChange with the UW Forest Mycobiome Lab: a C++/R library that simulates wind-driven spore dispersal over forested, hilly terrain, parallelized with RcppParallel and OpenMP.
- Invited talk on machine learning in environmental science at the University of Washington (2024).

Software Engineer, *Paychex* Apr 2022 – Jan 2024
Remote

Built and tested data-integration services between enterprise systems and Oracle E-Business Suite.

- Built Java Kafka consumers that moved data between enterprise databases, deployed through Jenkins and OpenShift CI/CD pipelines.
- Created Splunk dashboards tracking the 200–400 users shared between enterprise systems and Oracle EBS, with alerts for production incidents; prepared and validated Oracle EBS data with SQL.
- Wrote full test suites for 5+ Python services in the CI pipeline, keeping production defect rates low.

Postdoctoral Research Associate, *Rochester Institute of Technology* Feb 2021 – Apr 2022
Rochester, NY

HPC simulations of supermassive black hole binaries in an NSF-funded project.

- Led a 7-person team upgrading PatchworkMHD, a C code for magnetohydrodynamic simulations of supermassive black hole binaries, in an NSF-funded project.
- Added black hole spin to the simulations with under 5% runtime overhead.
- Ran and benchmarked large production simulations on Frontera (TACC), about 10,000 node-hours, and identified performance bottlenecks in the parallel code.
- Calibrated Paramo model parameters against Fermi-LAT gamma-ray spectra with gradient-based optimization, and supervised a graduate student applying gradient descent to the same problem.
- Co-authored 2 papers from a multi-institution study of binary neutron star mergers [6, 7] and a third on blazar heating and cooling [8].

Postdoctoral Research Fellow, *Purdue University* Oct 2018 – Nov 2020
West Lafayette, IN

Radiative-transfer modeling of relativistic jets (blazars and gamma-ray burst afterglows).

- Architected Paramo, an open-source Fortran 95 library that solves the Fokker–Planck equation coupled to radiative transfer; parallelized and optimized it with OpenMP; GPU offload tested with OpenACC.
- Paramo has been adopted by other research groups, including Combi & Siegel (2023).
- Co-I on two NASA Fermi Guest Investigator proposals; one was funded ($68K) and supported the finding that blazar jets are launched with similar energy per baryon, independently of their power [5].
- Added numerical-integration and OpenMP features to Paramo and built Python tools to compute energy losses and spectra of high-energy particles in gamma-ray burst afterglows [4].
- Mentored 3 graduate students (1 M.S., 2 Ph.D.), co-authoring papers with each.
- Modeled the COVID-19 outbreak in Mexico (Python) and co-wrote Spanish-language infographics in a campaign against misinformation.

Postdoctoral Research Fellow, *Universidad Michoacana de San Nicolás de Hidalgo* Jan 2018 – Sep 2018
Morelia, Mexico

- Built a Python pipeline that turned GRTrans black hole simulation images into training data for an SVM classifier of black hole spin (grayscale conversion, intensity normalization, spatial feature extraction).
- Released an open-source Python tool for radiative-transfer spectra and light curves.
- Organized an HDF5 workshop to train graduate students in high-volume data storage.

Graduate Research Assistant, *Universitat de València* Oct 2011 – Jul 2017
Valencia, Spain

- Automated runs of the C-SPEV radiative-transfer code with Shell and Python pipelines: 10–60 simulations per project and tens of GB of HDF5 output, with data-quality checks for downstream analysis.
- Analyzed Fermi-LAT and VLBA multi-wavelength observations, cross-matching sources across catalogs and fitting log-parabola spectra.
- Fit C-SPEV simulation models to telescope data, identifying spectra and light-curve patterns that quantify plasma magnetization in blazars.
- Extended C-SPEV to compute discrete and continuous spectra from particle distributions of arbitrary shape, without affecting simulation runtime.
- Published 2 first-author papers in MNRAS [2, 3].

Education

Ph.D. in Physics, *Universitat de València* Oct 2011 – Jul 2017
Valencia, Spain

Excellent *cum laude*
Advisors: Prof. Miguel A. Aloy and Dr. Petar Mimica
Thesis: Numerical treatment of radiation processes in the internal shocks of magnetized relativistic outflows

M.Sc. in Physics, *Universidad Michoacana de San Nicolás de Hidalgo* Aug 2009 – Sep 2011
Morelia, Mexico

Advisor: Prof. José A. Cervera
Thesis: *Study of TOV stars with the SPH method*

B.Sc. in Physics, *Universidad Autónoma del Estado de México* Aug 2004 – Dec 2008
Toluca, Mexico

Advisor: Prof. Francisco S. Guzmán
Thesis: *Numerical solution of null geodesics for the generation of gravitational lenses produced by spherically-symmetric and static spacetimes*
Lic. Juan Josafat Pichardo Cruz Award

Grants and Fellowships

Research Grants

NASA Fermi Guest Investigator Program, Cycle 12 2019
A simple model to understand the blazar sequence Grant #121077, $68K
PI: D. Giannios; Co-I: J. M. Rueda-Becerril

Fellowships

International Postdoctoral Fellowship Oct 2018 – Nov 2020
National Council of Science and Technology (CONACyT), Mexico

Postdoctoral Fellowship Jan 2018 – Sep 2018
Secretariat of Public Education, Mexico (Program for the Professional Development of Higher Education Institutions)

Study-Abroad Fellowship Sep 2014 – Aug 2016
National Council of Science and Technology (CONACyT), Mexico

Santiago Grisolía Fellowship Oct 2011 – Jun 2014
Council of Education, Research, Culture and Sport, Valencian Community, Spain

M.Sc. Fellowship Sep 2009 – Aug 2011
CONACyT, at the Institute of Physics and Mathematics, Universidad Michoacana de San Nicolás de Hidalgo

Summer Research Fellowship (XVII Summer of Scientific Research) Jun 2007 – Aug 2007
Mexican Academy of Sciences

Software and Projects

Blazar Population ML Jan 2026 – Present
Scientific ML (Python, scikit-learn, PyTorch) github.com/altjerue/ilwikak-ml

- Applying classical ML and Bayesian inference to the Fermi-LAT 4LAC-DR3 catalog (3,407 sources) to recover physical jet parameters from multi-wavelength data.
- Building a neural-network emulator of the physics-based Tleco model that maps physical jet parameters to observable spectral energy distributions, to be validated against Tleco output (in progress).
- Forecasting blazar gamma-ray flares with a time-series foundation model fine-tuned on Tleco-generated synthetic light curves.

WindsOfChange Aug 2024 – Present
Lagrangian particle-dispersion library (C++/R) github.com/UW-ForestMycobiomeLab/WindSporesHills

- Simulates particle dispersion, atmospheric turbulence, and flow over hilly terrain with forest canopy, based on analytical models (Massman & Weil 1999; Finnigan & Belcher 2004); designed to scale to tens of thousands of particles over kilometer-scale domains.

Tleco Jan 2024 – Sep 2024
Radiative-transfer toolkit (Rust/Python) github.com/zkdavis/Tleco

- Numerical PDE solvers, particle-distribution algorithms, and spectral calculations for relativistic plasmas; successor to Paramo [9].

Paramo Oct 2018 – Apr 2022
Radiative-transfer library (Fortran 95, OpenMP) github.com/altjerue/paramo

- Fokker–Planck and radiative-transfer solver for relativistic particle distributions, parallelized with OpenMP; used by other groups, including Combi & Siegel (2023).

PatchworkMHD Feb 2021 – Apr 2022
Large-scale MHD simulation code (NSF project)

- Led a 7-person upgrade of this production C code for HPC environments, adding black hole spin with under 5% runtime overhead.

Awards

Marcos Moshinsky Award for Best Poster Sep 2020
9th International Workshop on Astronomy and Relativistic Astrophysics (IWARA 2020), video conference

Lic. Juan Josafat Pichardo Cruz Award 2009
Universidad Autónoma del Estado de México
For defending a licentiate thesis within a year of completing the undergraduate coursework.

Presentations

Invited Talks

The Role of Machine Learning in Environmental Science Mar 2024
Seminar on Climate Change Ecology, University of Washington Seattle, WA

Morphology of the spectra from numerical simulations of the internal shocks model for blazars Feb 2019
Astrophysics Seminar, Purdue University West Lafayette, IN

Numerical simulations of the internal shocks model in magnetized relativistic jets of blazars Jun 2018
DATA Group Weekly Seminar, Instituto de Astronomía, UNAM Mexico City, Mexico

Numerical treatment of non-thermal radiation in the internal shocks model for blazars Mar 2018
Weekly Seminar, Instituto de Física y Matemáticas, Universidad Michoacana de San Nicolás de Hidalgo Morelia, Mexico

Numerical simulations of the internal shock model in magnetized relativistic jets of blazars Oct 2014
IVICFA's Fridays: Computation in Physics, IFIC Paterna, Spain

Contributed Talks

Simulations of supermassive binary black holes accretion dynamics in the spinning case Apr 2022
APS April Meeting 2022 New York, NY

A numerical approach to the Klein-Nishina corrections of radiative cooling in relativistic outflows Apr 2021
APS April Meeting 2021 Online

The blazar sequence revised Sep 2020
9th International Workshop on Astronomy and Relativistic Astrophysics Online
Video: youtube.com/watch?v=BAZNWLNT69M

Influence of the magnetic field on the spectral properties of blazars in the internal shocks scenario Jun 2014
Extreme-Astrophysics in an Ever-Changing Universe Ierápetra, Greece

Numerical study of broadband spectra caused by internal shocks in magnetized relativistic jets Jul 2013
XXXIV Biennial Meeting of the Royal Spanish Society of Physics Valencia, Spain

Posters

A numerical approach for radiative cooling in relativistic outflows Sep 2020
9th International Workshop on Astronomy and Relativistic Astrophysics Online
Marcos Moshinsky Award for Best Poster. Video: youtube.com/watch?v=0TJiKg7kOPI

Numerical simulations of the internal shock model in magnetized relativistic jets of blazars Dec 2014
Swift: 10 Years of Discovery Rome, Italy

Numerical study of broadband spectra caused by internal shocks in magnetized relativistic jets Jun 2013
The Innermost Regions of Relativistic Jets and Their Magnetic Fields Granada, Spain

Teaching and Mentoring

Zachary Davis, graduate student 2018 – 2022
Department of Physics and Astronomy, Purdue University Mentoring
Co-authored papers [8, 9]

Amanda O. Harrison, graduate student 2018 – 2020
Department of Physics and Astronomy, Purdue University Mentoring
Co-authored paper [5]

Hao Zhang, graduate student 2018 – 2019
Department of Physics and Astronomy, Purdue University Mentoring
Co-authored paper [4]

Thermodynamics (graduate level) Jun 2018
Instituto de Física y Matemáticas, Universidad Michoacana de San Nicolás de Hidalgo Substitute Instructor

Professional Development

High Performance Computing on Frontera May – Jun 2021
Jason Allison et al., TACC, Austin, TX Lecture series

Writing Winning Grants Nov 2019
Dr. Lauren Broyles, Purdue University Lecture

XSEDE HPC Workshop: Summer Boot Camp Jun 2019
John Urbanic, Purdue University Workshop

Data Analysis and Machine Learning with Python Feb 2017
Dr. Alejandro Torres, Universitat de València Workshop

Numerical Relativity Simulations of BBH Coalescence Using the Einstein Toolkit Jul 2016
Dr. Vassilios Mewes, Universitat de València Workshop, 8 hours

The Universe in the Light of PLANCK and BICEP2 May 2014
Prof. Nick Mavromatos, Universitat de València Lecture series, 2 credits

Dark Matter Sep 2013
Prof. Alejandro Ibarra, Universitat de València Lecture series, 2 credits

International Cargèse School on Cosmic Accelerators — Apr – May 2013
Institut d'Études Scientifiques de Cargèse, France — Summer school

Introduction to C++ Programming — Apr 2012
Dr. Jacek Generowicz, Universitat de València — Workshop, 6 credits

Numerical Relativistic Astrophysics — Mar – Apr 2012
Prof. Luciano Rezzolla, Universitat de València — Lecture series, 9 hours

Fortran for Scientific Computing — Mar 2012
HLRS, University of Stuttgart, Germany — Workshop, 33 hours

Outreach

Los más rápidos y los más furiosos (The Fastest and the Most Furious) — Sep 2020
Community of Undergraduate Physics Students, Juárez Autonomous University of Tabasco — Online talk

Una simulación de la física y la astrofísica (A Simulation of Physics and Astrophysics) — Aug 2020
Community of Undergraduate Physics Students, Juárez Autonomous University of Tabasco — Online talk

ANITA y la teoría de los universos paralelos (ANITA and the Theory of Parallel Universes) — May 2020
Científicos Mexicanos en el Extranjero — Blog post
mexiciencia.github.io/post/anita

¿Qué es el modelo SIR? (What is the SIR Model?) — May 2020
Científicos Mexicanos en el Extranjero — Blog post
mexiciencia.github.io/post/modelo-sir

Evolución del brote epidémico de COVID-19 (Evolution of the COVID-19 Epidemic Outbreak) — Apr 2020
Científicos Mexicanos en el Extranjero — Blog post
Data analysis and modeling collaborator. mexiciencia.github.io/post/covid19

Annual Department of Physics and Astronomy Poster Event — Nov 2019
Purdue University — 3 posters

Post-Doc Panel Q&A: What Happens When We Complete Our PhDs? — Apr 2019
Department of Physics and Astronomy, Purdue University — Panelist

Annual Department of Physics and Astronomy Poster Event — Nov 2018
Purdue University — Poster

¿Decía Einstein la verdad? (Was Einstein Telling the Truth?) — Mar 2009
Facultad de Ciencias, Universidad Autónoma del Estado de México — Talk

Service

Organizing contributor — Dec 2012
X Scientific Meeting of the Spanish Astronomical Society — Valencia, Spain

Student representative, Governing Council of the Faculty of Sciences — Aug 2007 – May 2009
Universidad Autónoma del Estado de México — Toluca, Mexico

Languages

Spanish (native), English (full professional proficiency), Catalan (basic), Nahuatl (basic)
