Professional Summary

Physicist (Ph.D. and M.Sc. in Physics) with ten years of research in computational astrophysics. Taught a graduate thermodynamics course and mentored three graduate researchers who co-authored papers with me. Teaching approach built on intuition, critical thinking, and collaborative problem-solving.

Teaching and Mentoring

Thermodynamics (graduate level) **Jun 2018**
Instituto de Física y Matemáticas, Universidad Michoacana de San Nicolás de Hidalgo Substitute Instructor

Zachary Davis, graduate student **2018 – 2022**
Department of Physics and Astronomy, Purdue University Mentoring

Amanda O. Harrison, graduate student **2018 – 2020**
Department of Physics and Astronomy, Purdue University Mentoring

Hao Zhang, graduate student **2018 – 2019**
Department of Physics and Astronomy, Purdue University Mentoring

Education

Universitat de València, *Ph.D. in Physics, Excellent Cum Laude* **Jul 2017**

Universidad Michoacana de San Nicolás de Hidalgo, *M.Sc. in Physics* **Sep 2011**

Universidad Autónoma del Estado de México, *B.Sc. in Physics* **Dec 2008**

Experience

Independent Contractor, *Mercor* **Jan 2026 – Present**
- Evaluate physics reasoning in AI model outputs for technical accuracy, identifying failure modes and providing structured feedback.

Postdoctoral Research Fellow, *Purdue University* **Oct 2018 – Nov 2020**
- Obtained and led a NASA-funded grant studying radiation from active galaxies.
- Mentored three graduate researchers; two are now postdoctoral researchers.
- Published 3 peer-reviewed papers.

Postdoctoral Research Associate, *Rochester Institute of Technology* **Feb 2021 – Apr 2022**
- Led an NSF-sponsored project upgrading a high-performance simulation code for modeling black hole binaries.
- Collaborated on a multi-institutional study of binary neutron star mergers, resulting in 2 publications.

Postdoctoral Research Fellow, *Universidad Michoacana de San Nicolás de Hidalgo* **Jan – Sep 2018**
- Developed a Python pipeline to process black hole simulation outputs from the GRTrans numerical code, generating SVM training data for radio image prediction.
- Built open-source data analysis and visualization tools in Python for radiative transfer phenomena in relativistic astrophysics scenarios.

Outreach

Los más rápidos y los más furiosos (The Fastest and the Most Furious) **Sep 2020**
Community of Undergraduate Physics Students, Juárez Autonomous University of Tabasco Online talk

Una simulación de la física y la astrofísica (A Simulation of Physics and Astrophysics) **Aug 2020**
Community of Undergraduate Physics Students, Juárez Autonomous University of Tabasco Online talk

Skills

Physics: Mechanics, electromagnetism, thermodynamics, relativity, statistical physics, astrophysics

Computing: Python, Fortran, C/C++, high-performance/parallel computing

Languages: English (fluent), Spanish (native), Nahuatl (basic)

Selected Publications (9 total, 3 first-author)

Full list available on request.
